JOSÉ DAVID SERNA

Game Developer · UX Design · Unity / Blender

jdserna00@gmail.com | jdserna00.github.io/JDSerna00 | github.com/jdserna00 | linkedin.com/in/[josé-serna-88034334a] | [Medellin, Colombia]

SUMMARY

Game developer with a UX design focus and hands-on experience across mobile, tower-defense, and educational titles. Shipped a live mobile game as post-launch lead, cutting backend latency by 70% and lifting daily retention through A/B-tested interface flows. Comfortable owning the full loop — gameplay programming, art production in Blender and pixel art, and research-driven UI design.

SKILLS

Engines	Unity (2D & 3D), Blender
Languages	C#, Lua, Python, SQL]
Backend & Tools	Firebase, Git & GitHub, Figma, [Jira / Trello]
UX & Design	UX research, A/B testing, UI implementation, design systems, pixel art
Specialties	Performance optimization, retention analysis, game design, architecture

PROJECT EXPERIENCE

Root Connections — Idle Mobile Game

[Start] – [End] · Remote

Mid development and Post-Launch Lead

- Reduced Firebase latency by **70%** by restructuring client calls into batched requests, improving load performance across the live player base.
- Increased daily retention by designing and running **A/B-tested UI flows**, iterating on onboarding and progression screens based on measured outcomes.
- Owned the post-launch roadmap end to end — performance profiling, UX research, and feature implementation in Unity/C#.
- Partnered with [design] to prioritise fixes by player impact and ship on a live release cadence.

FrelseTD — Pixel Art Tower Defense

[Start] – [End] · Solo

Developer & Artist

- Programmed all tower and enemy behaviour, including pathfinding and targeting logic, in Unity/C#.
- Produced the complete pixel art asset set and implemented every in-game interface.
- Delivered the full project solo from concept to playable build, managing scope across art, code, and UI.

Mangrove Rescue — Educational Game

[Start] – [End] · [Team size]

Lead Developer · UX/UI Design

- Led core mechanics and art implementation for an educational title aimed at [target audience].
- Designed the UX and UI with a focus on [clarity for younger players / accessibility / learning flow].
- Coordinated [N] contributors, translating learning objectives into playable systems.

Side Projects — Game Dev & UX Exploration

Ongoing

Self-Directed

- [PostKnightClone]: [Working on it, mixing it with databases to further improve my SQL abilities].

EDUCATION

[Degree / Programme] — [Institution]

[Start] – [End]

[Degree: Engineering on design of digital entertainment]

ADDITIONAL

- **Languages:** Spanish (native), English ([B1]).
